

JOB DESCRIPTION

Job Title: UX – UI Designer**Group: Software Development****Salary Band: T2****Reports to: TBC**

ROLE PURPOSE

We are seeking someone that has specific UI Design skills to work at the CCDC on key web-based projects to ensure that we have good UI Design from the start. The successful candidate will help us to define UI Design guidelines and a framework to apply to future projects so we are positioned to develop elegant, intuitive and consistent web interfaces going forward.

MAIN DUTIES AND RESPONSIBILITIES

- Collaborate with product management, UX research and software engineering to define and implement innovative solutions for the product direction, visuals and experience
- Execute all visual design stages from concept to final hand-off to engineering including high fidelity designs
- Identify design problems and devise elegant solutions
- Make strategic design and user-experience decisions related to core, and new, functions and features
- Create wireframes, storyboards, user flows, process flows and site maps to effectively communicate interaction and design ideas
- Establish and promote design guidelines, best practices and standards and processes that ensure these are consistently adopted
- Mentor and train existing team members in best practice UI design and implementation

Our Values**Quality, Innovation, Passion, Community, Collaboration, Integrity, Customer Centricity, Agility**
